SUMMARY

Full Stack Developer with hands-on freelance experience building end-to-end MERN-stack web applications and AI-driven automation solutions. Proficient in Python, JavaScript, LLM integration, RAG pipelines, and computer vision, with a track record of shipping production features that improved matching precision by 25% and deploying live systems on AWS. Passionate about combining solid engineering with practical, intelligent automation to solve real-world problems.

SKILLS

Python • Java • JavaScript • SQL • React.js • HTML5 • CSS3 • Bootstrap • Node.js • Express.js • REST API Design • MongoDB • MySQL • LLM API Integration • RAG Pipelines • OpenCV • AWS EC2 • Git • GitHub • CI/CD Basics • Postman • VS Code • Agile Collaboration • Version Control • API Testing • Client Requirements Gathering • Generative AI

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

2024 - Present

Self-Employed / Remote

- Designed and delivered end-to-end full-stack web applications for independent clients using React, Node.js, Express.js, and MongoDB/MySQL, managing each project from requirements gathering through deployment.
- Built and integrated RESTful APIs and third-party services to power dynamic, data-driven front-end experiences across multiple client projects.
- Developed AI-powered features using LLM APIs and RAG pipelines, adding intelligent search, recommendations, and conversational capabilities to client applications.
- Applied computer vision (OpenCV) techniques to build image-based analysis and automation features for client use cases.
- Collaborated directly with clients to translate business requirements into scalable, maintainable technical solutions, owning version control (Git), testing, and cloud deployment (AWS EC2) throughout the project lifecycle.

EDUCATION

B.Tech in Computer Science & Engineering (AI Specialization) | CGPA - 7.0

2027

Parul University — Vadodara, Gujarat

CERTIFICATIONS AND TRAINING

Oracle Cloud Infrastructure Generative AI Professional Certification, Oracle AI Foundations Associate, Oracle Cloud Infrastructure DevOps Professional Certification

PROJECT EXPERIENCE

AgroAI - AI-Powered Crop Health & Farmer Marketplace Platform

Built an AI-based crop disease detection feature that analyzes uploaded crop images to identify diseases and guide timely treatment decisions. Created an interactive learning module to help farmers adopt best practices for crop growth and maintenance. Integrated an online consultation feature connecting farmers directly with agricultural experts in real time. Developed a marketplace module enabling farmers to sell produce at real-time, market-linked pricing, streamlining the farmer-to-buyer transaction flow.

SkillSense AI - Skill-Matching Platform

Designed and built a full-stack, MERN-based skill-matching platform handling the end-to-end flow from user profile input to ranked skill/job matches. Engineered an embedding-based semantic matching model to compare candidate and role profiles, improving precision@5 by approximately 25% over a traditional TF-IDF baseline. Deployed and managed the application on AWS EC2, handling server configuration, environment setup, and uptime monitoring for live usage.
